Professional Summary

Backend Developer with hands-on experience building **RESTful microservices** using **Java 17** and **Spring Boot**. Skilled in designing scalable service architectures, securing APIs with **JWT and Spring Security**, and optimizing relational databases with **JPA/Hibernate**. Experienced with containerization using **Docker** and cloud deployment on **AWS (EC2, S3)**. Comfortable working in Agile environments with a focus on clean, testable backend code.

Technical Skills

Languages: Java 17, SQL, TypeScript, Python

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security (JWT/OAuth2)

Architecture: Microservices, API Gateway, Eureka, Apache Kafka (basic)

Databases: MySQL, PostgreSQL, Redis (basic), Query Optimization

DevOps & Cloud: Docker, AWS (EC2, S3), CI/CD, Maven

Testing & Tools: JUnit 5, Mockito, Postman, Swagger/OpenAPI, JIRA

Experience

Ceasefire Technologies Pvt Ltd November 2024 – April 2025
Backend Developer Intern

- Designed and developed **scalable RESTful APIs** handling high-frequency service requests for the Service Management Platform using **Spring Boot** and **Spring Data JPA**, with **API validation** and **global exception handling**, improving overall system stability by **10%**.
- Optimized **MySQL** queries and indexing strategies using JPA mappings, reducing API response time and improving backend performance by **15%**; integrated **SLF4J/Logback** for JSON-formatted request logging and traceability.
- Collaborated with cross-functional teams during code reviews to enforce backend best practices, increasing first-time resolution (FTR) rates by **25%**.
- Actively participated in **CI/CD pipeline** workflows using **Git**, ensuring automated integration and deployment of backend services.
- Deployed containerized backend services on **AWS EC2**, managing environment configuration to ensure high availability and secure production access.
- Wrote and maintained unit tests using **JUnit 5** and **Mockito**, achieving approximately **70%+ unit test coverage** for critical backend services and validating API contract integrity.

Lagozon Edutech PVT. LTD May 2022 – June 2022
Data Analyst Intern

- Wrote **SQL queries** to analyze product data and improve inventory efficiency by **15%**.
- Developed Python scripts for data processing and reporting.

Projects

MediConnect – Microservices-based Healthcare Management System GitHub Link

- Architected a **Microservices backend** using **Spring Boot**, with separate services for Patient, Doctor, and Appointment domains, improving modularity and independent deployability.
- Configured an **API Gateway** for centralized request routing and a **Eureka Discovery Server** for dynamic service registration and load balancing.
- Implemented **JWT-based Authentication** and **Role-Based Access Control (RBAC)** using **Spring Security**, securing patient health records across Doctor, Patient, and Admin roles.
- Designed a **Slot Management Engine** with concurrency-safe booking logic, eliminating appointment double-booking across **100%** of test cases.
- Integrated **MySQL** via **Spring Data JPA/Hibernate** with optimized entity relationships; validated all REST endpoints using **Postman** and documented with **Swagger**.
- Implemented a basic **Redis caching** strategy to reduce repetitive database load and improve low-latency response times; applied **rate limiting** and **retry mechanisms** to strengthen API fault tolerance.
- Containerized individual services using **Docker** and explored **Apache Kafka** for asynchronous event-driven notifications between services.

Education

Gandhi Institute of Engineering & Technology 2021 – 2024
Bachelor of Technology in Computer Science & Engineering

Certifications

- **Cloud Computing** – NPTEL (National Programme on Technology Enhanced Learning)
- **MEAN Stack Developer** (MongoDB, Express.js, Angular, Node.js) – Moniba Compu Academy Pvt Ltd
